BAIT-US-SUBUH FRANKFURT · OFFICIAL TIMETABLE SYNC

Prayer Times Automation — User Guide

PAGE 1 OF 4: APPLICATION OVERVIEW & METHOD 1 (ADD CALENDAR WITHOUT LOGIN)

What is this Application & What Does It Do?

Prayer Times Automation connects the official Bait-us-Subuh (Frankfurt am Main) prayer timetable directly to your smartphone calendar. When an updated schedule picture is uploaded to the mosque Google Drive, the automated OCR backend reads all times and synchronizes all 5 daily prayers (**Fajr, Zuhr, Asr, Maghrib, Isha**) and **Friday Jummah** directly into your calendar.

✓ 100% Official Mosque Timings

✓ Weekly Auto Background Sync

✓ Supports Android & Apple iOS

Clarification: The App Has No Built-In Azan Sound Player

The application itself does **not** contain built-in Azan audio files or an audio player. All prayer reminder alarms and rings are sounded exclusively by your smartphone's Calendar app notification settings. To play an Azan MP3 or custom chime, follow **Page 4** of this guide.

1 Method 1: Add Calendar Without Login (100% Anonymous)

No Google account login required · No password needed · Completely private subscription

OPTION 1 — For PC & Tablet Screens

Scan QR Code with Camera

Open your smartphone's built-in camera and point it at the QR code displayed on the screen.

CAMERA QR SCANNER

✓ Tap notification popup to add calendar!

OPTION 2 — For Mobile Browsers

Click Direct "Add without SCAN"

If viewing the page directly on your smartphone, tap the direct button without scanning:

+ Click to Add without SCAN directly

✓ Calendar app opens automatically to subscribe!

One-Time Action Needed: Subscribed public calendars are silent by default. **Turn to Page 2** to set your lifetime alarm time!

v class="page-container" id="page-2">

ONE-TIME LIFETIME CONFIGURATION · ANDROID & APPLE IOS

Method 1: Set Lifetime Prayer Alarms

PAGE 2 OF 4: CONFIGURE DESIRED ALARM TIME BEFORE PRAYERS (LIFETIME RULE)

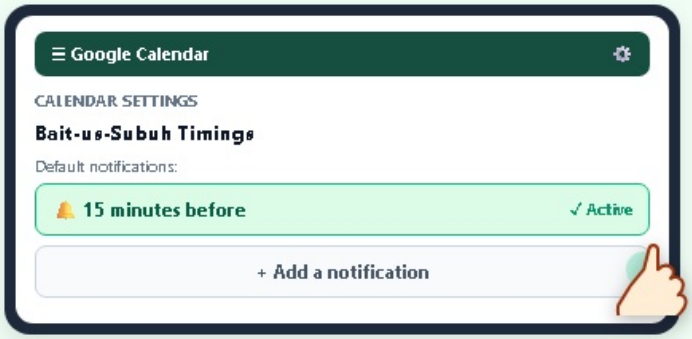

Why Do Method 1 Users Need This One-Time Setup?

Modern smartphone operating systems (Android & Apple iOS) deliberately prevent public calendar subscriptions from turning on loud alarms automatically without user consent. By configuring your notification time **once** in your calendar app settings, you establish a **permanent lifetime rule** for all 5 daily prayers (Fajr, Zuhr, Asr, Maghrib, and Isha)!

FOR ANDROID PHONES

Samsung, Google Pixel, Xiaomi, OnePlus, Motorola

`Google Calendar > Menu (☰) > Settings > Bait-us-Subuh`

1. Open the **Google Calendar app** on your phone.
2. Tap the **Menu icon (☰)** in top-left corner.
3. Scroll down and tap **Settings (⚙)**.
4. Select **"Bait-us-Subuh Timings"** calendar.
5. Under default notifications, tap **"Add a notification"**.
6. Select your desired reminder time: e.g. **15 minutes before**.

✓ **Done! Google Calendar will now alert you for every prayer!**

FOR APPLE IPHONE & IPAD

iPhone (all iOS versions) & iPad

`Apple Calendar > Calendars > Info (i) > Event Alerts: ON`

1. Open the built-in **Calendar app** on your iPhone.
2. Tap **Calendars** at the bottom center.
3. Find and tap the **Info icon (i)** next to *Bait-us-Subuh*.
4. Ensure **"Event Alerts"** toggle is switched **ON**.
5. In iPhone **Settings > Calendar > Default Alert Times**, set Events to **15 minutes before** (or use iOS Google Calendar app).

✓ **Done! Your iPhone will now alert you for every prayer!**

v class="page-container" id="page-3">

AUTOMATIC TIMETABLE SYNC & AUTOMATIC ALARMS INJECTION

Method 2: Google Account Login

PAGE 3 OF 4: 15 MIN BEFORE FOR DAILY PRAYERS · 90 MIN BEFORE FOR JUMMAH

2️⃣ Method 2: Google Account Integration (OAuth 2.0)

Unlike Method 1 where you subscribe anonymously, **Method 2** authorizes the Prayer Times engine to manage prayer timings directly in your personal Google Calendar account.

⭐ **The Big Advantage: Reminder alarms are created AUTOMATICALLY with every prayer event!**

1

Google Login

Member clicks "Sign in with Google" and grants calendar permission.

2

Drive OCR Scan

Backend reads official timetable image uploaded to Google Drive.

3

Auto Reminder Injection

Events synced directly with pre-set reminder alarms included!

DAILY PRAYERS — 5 Prayers Daily

🔔 15 Minutes Before

Fajr, Zuhr, Asr, Maghrib, and Isha events are automatically saved with a **15-minute prior alarm**.

✓ Gives you ample time for Wudu (ablution) and getting ready for Salat.

FRIDAY JUMMAH — Every Friday

🕌 90 Minutes Before (1h 30m)

Friday Jummah prayer is automatically configured with a **90-minute prior alarm**.

✓ Ample time to prepare, travel to Bait-us-Subuh mosque, and attend the Friday sermon.

CALENDAR EVENT PREVIEW (AUTOMATICALLY GENERATED BY SERVER):

🕌 **Zuhr Prayer — Bait-us-Subuh**
Today · 13:30 – 14:00 · Official Timetable Sync

🔔 15m before (Default)

SOUND SELECTION FOR METHOD 1 & METHOD 2 · ANDROID & APPLE IOS

Setting Desired Ringtone or Azan

PAGE 4 OF 4: HOW TO CHOOSE AZAN OR ANY CUSTOM RINGTONE FROM YOUR DEVICE

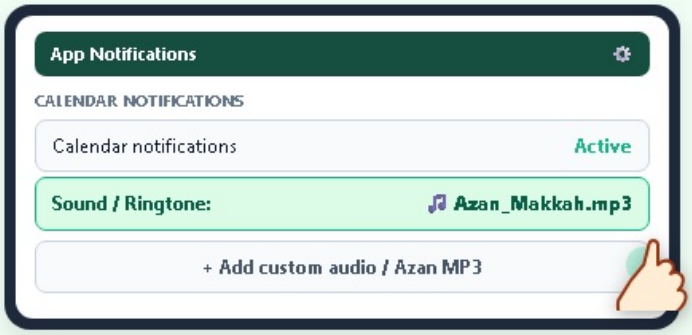

Important: How Sound Actually Works on Both Methods

Whether you connected via **Method 1 (QR scan / direct button)** or **Method 2 (Google login)**, all notification ringtones are sounded exclusively by your phone's Calendar notification system. To hear an Azan or your favorite chime, simply select any audio file already stored on your device using the steps below!

ANDROID: GOOGLE CALENDAR SOUND

Samsung, Pixel, Xiaomi, OnePlus, Motorola

`Settings › Apps › Google Calendar › Notifications › Sound`

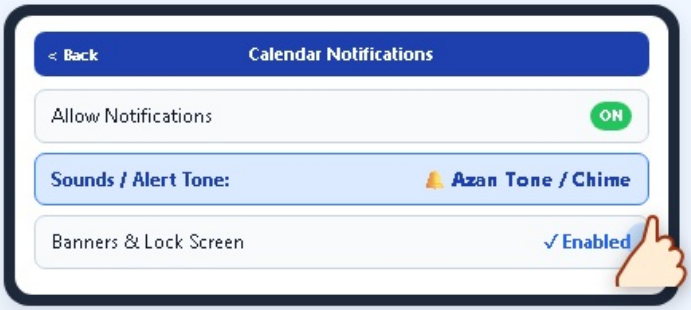

1. Open phone **Settings (⚙)** > tap **Apps**.
2. Tap **Google Calendar** > tap **Notifications**.
3. Tap **Calendar notifications** > tap **Sound**.
4. Tap **"+" / "Add ringtone"** to browse files.
5. Select your downloaded **Azan MP3** file!

💡 **Tip:** Copy your Azan MP3 into your phone's `Notifications` or `Ringtones` folder so it shows in the list.

APPLE iOS: CALENDAR ALERT SOUND

iPhone & iPad (Apple or Google Calendar app)

`Settings › Notifications › Calendar › Sounds`

1. Open iPhone **Settings (⚙)** > tap **Notifications**.
2. Scroll down and tap **Calendar** (or Google Calendar).
3. Verify **"Allow Notifications"** is switched **ON**.
4. Tap **Sounds** (or go to **Sounds & Haptics**).
5. Select your desired chime or custom Azan tone!

💡 **Tip:** Ensure your iPhone physical mute switch is off and Calendar notifications are allowed in **Settings** > **Focus**.

SUMMARY & APP RECOMMENDATIONS:

- **Android:** Google Calendar is pre-installed on virtually all Android phones. No extra download needed.
- **Apple iPhone:** Works with Apple Calendar. For the smoothest Google sync experience, download the free **Google Calendar app** from the Apple App Store.
